- Effective message, clarity of purpose
- Aesthetic quality of the images, impactful design
- Responsible use of materials, textiles, or artistic setting
- Innovation and creativity, a sense of newness and originality

Are there legal issues and/or copyright laws I should be aware of?

Copyright laws in all European and Western countries are extremely severe and protective of authorship and intellectual property. Many countries have laws protecting an artist's moral and financial rights. It is important, therefore, that anything you submit is your own original work, unless otherwise indicated.

You are required to gain written permission to replicate or in any way utilise materials that are not your own. This includes, but is not limited to, putting text into quotation marks and clearly referencing and quoting the original sources of any visual images that are not your own original work. You must also credit any external professional agencies who have contributed to the project and list the names of each contributor.

Sources must be free of copyright protection, i.e. you must confirm that the sources of **all** visual **images** may be reproduced, distributed, displayed and/or performed publicly.

Only those who submit a signed declaration of originality will be considered for the prize.

The responsibility for the originality of the project sits entirely with the author.
